A SUBSIDIARY OF THE INGEROP

We pride ourselves on being part of a group comitted to shaping the future, driving us to be brave and bold.

Yves METZ
President of Ingérop

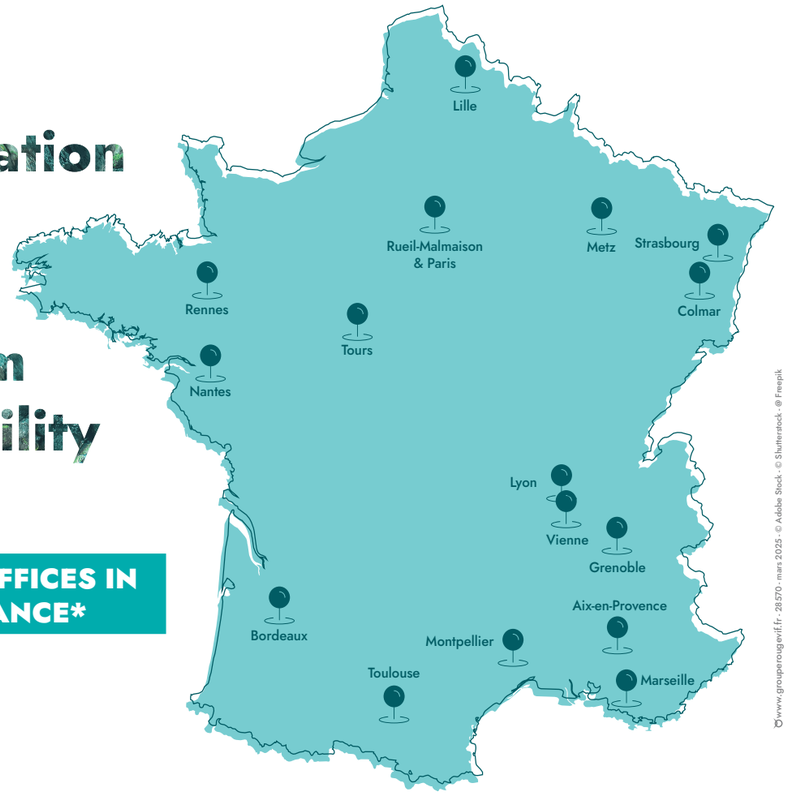

"The ecological, energy, and industrial transition lies at the core of Ingérop's strategic vision. As a leading engineering and consulting firm, our group has been committed for many years to incorporating all components of the environment as early as possible into our projects.

The establishment of Actierra in January 2024, our environmental subsidiary focused on ecological and climate-related issues, pushes this commitment forward. Today, we have over 200 environmental and life sciences experts who support our clients and partners throughout the entire project lifecycle, from early strategic planning to long-term operations. They embody the standard of ecological excellence to which we collectively aspire."

OUR VALUES

Act

to build a sustainable and resilient world in harmony with our ecosystems

Experts dedicated to the natural and living world

We are a consulting and engineering firm specializing in ecological transition, placing the environment at the root of our projects. We are committed to supporting the ecological transformation of our societies and addressing the climate and environmental challenges that concern us all.

With proven expertise in **diagnostics**, **strategic consultancy**, and **environmental evaluation**, we are equipped to address the most complex issues at every stage of the project lifecycle - all in support of a shared ambitious vision. We offer a broad range of services from strategic planning to on-site supervision.

OUR **MISSIONS**

Strategy · **Environmental planning** · **Consulting** · **Pre-operational studies** · **Operational studies** · **Suivi environmental monitoring**

17 offices **in France**

300 + experts

8 areas of expertise

10% of our hours dedicated to R&D

Simon DUMOULIN
Director of Actierra

Actierra brings together environmental expertise and technical skills capable of responding to the climate emergency. The ecological transition and the digital revolution are transforming our businesses. The environment is, in fact, at the heart of everything. We aspire to be part of the key players in the transformation by embodying excellence in ecological engineering.

Choosing Actierra means helping to reduce the environmental impact of your projects and improving their resilience, which will facilitate your access to financing. From upstream strategy to operation, our global approach ensures the design of operational solutions to meet the challenges of mitigation and adaptation to climate change.

Coralie BALÈRE
Deputy Director of Actierra
